Of the Latest and most Approved Styles!

Having been engaged for a long time in an exclusive wholesale business, we have acquired extensive facilities for procuring goods in our line on the most reasonable terms, and offer them to the public at the lowest Eastern Over one hundred pardons were granted to Southern men to-day by the President, a plurality of which were to Alabamians, and a majority to Alabamians and Viginians. But two or three persons of much note are among the number, and those are of the negative rather than of the positive class of men. The crowd of female applicants was not sensibly diminished by the unfavorable state of the weather, and the anteroms were as substantially cranmed and jammed by males as ever before. A careful scrutiny of the new counterfeit \$100 compound interest notes by all the experts at the Treasury Department has convinced them the note was printed from the original dies, which were engraved outside the Treasury at the commencement of greenback manufacture. rts purchased in our store, will be renova-HOOP SKIRT

the commencement of greenback manufacture.

By the terms of the contract with the first engravers of greenback plates, the dies were to be given up to the Treasury Department when it chose to take the manufacture of currency into its own hands. Secretaries Chase and Fessenden each made demands for the plates during their terms of office, but neither succeeded in getting hold of all the stock, and consequently did not pay for the plates. Upon the accession of Mr. McCulloughto the Secretaryship, the engravers made a demand upon him pay for the plates. Upon the accession of Mr. McCullough to the Secretaryship, the engravers made a demand upon him for payment, alleging that they had delivered all the stock. This allegation was denied in a counter report from the Printing Bureau, although by some chicanery the report never fell under the eye of the Secretary, and all transactions between outside engravers and the Treasury Department were closed and settled by the payment of the claim. The back of the new counterfeit note is made of the back of the 5per cent interest note of the same denomination. The seroll and laths work is alike, with the exception of the central portion, where the interest is computed. The lettering of the computation is counterfeited. The balance of the back, it is believed, has been printed from the missing portions of the stock which has somehow came into the possession of the former. This opinion is shared by all the experts in the Treasury Department, who think the spurious plates may have been obtained by the Appleton process of transferring. At all events, the one hundred dollar compound interest counterfeit is a dangerous one, being as good looking in most parts as those of our Uncle's own make.

He says the statement put forth leaves it to be inferred that these dies and bed pieces are yet in the hands of the engravers, which is not the fact. When the settlement was had, the plates very unjustly were demanded from the engravers. They were given up under protest, the engravers saying that after being placed in the note printing department, there could be no risk of their being improperly used. The sequel shows that there has been an attempt to fix their use upon those who formerly held plates. This, the engraver says, is slanderous.
